

WHAT YOU WILL LEARN

Gain practical skills in IPS, IPS.POST, and CDS systems to optimize mail processing, accounting, and EAD data compliance.

- 1 End-to-end mail processing in IPS and IPS.POST, including item, receptacle, dispatch, and consignment handling
- 2 Configuration of national and local management modules to optimize workflow
- 3 Use of accounting functions to support cost recovery and rate management
- 4 Integration with domestic systems and enhancements in EDI supply chain visibility
- 5 Practical training on CDS and mobile applications to meet EAD requirements
- 6 Data quality improvement and QCS big data for performance tracking

WORKSHOP HIGHLIGHTS

Interactive sessions, system demos, expert-led guidance, peer exchange, and field visits enrich your technical understanding and operational insight.

- 1 Led by UPU Postal Technology Centre (PTC) expert and APPC faculty
- 2 Participant-centered sessions with live demonstrations and system walkthroughs
- 3 Site visit to EMS and Laksi Mail Center
- 4 Real-world scenario practice covering barcode recognition and inbound/outbound processing
- 5 Opportunities for Q&A, peer learning, and shared problem-solving

IPS/IPS.POST TRAINING WORKSHOP

4 to 8 August 2025 |
