

E-Commerce Solutions and Supply Chain Management

The future of the Posts lies in the E-Commerce business as the letter mail volume has been decreasing and the parcel post traffic has been increasing. There is a huge demand for E-Commerce items in the market. The e-Commerce Solutions and Supply Chain Management Course (ESC) aims to provide a thorough understanding of concepts, and business trends in both domestic and cross-border e-Commerce. This course will also include all the aspects of supply chain management and a set of software and technology tools that help businesses sell products and services online. These solutions typically include a website or online storefront, a shopping cart, payment processing systems, and inventory management tools. The participants will learn more about the e-commerce solutions and the entire supply chain of e-commerce platform with the SCM case studies from many Designated Operators.

Current Environment of Posts	e-Commerce Challenges and Opportunities	Last-mile delivery and Fulfillment
Strategic imperatives for Posts	e-Commerce ecosystem	Case Study from Posts
